7 How do you judge the presentation of the speaker team?

Inhouse-Training

Our experts at your site

Based on your objectives and requirements, we develop customized training courses for you that meet legal requirements. Our experienced speakers conduct these Inhouse Trainings directly at your site or as a webinar regardless of the location. You can specify the duration of the training individually. The Inhouse Trainings can be conducted in German or English.

Here you will find your suitable concept

Basic training With a practical orientation the basic training gives the employees quality awareness of the GMP, GDP and quality management requirements for pharmaceuticals, active ingredients or medicinal products.

Special training For specific target groups or special topics we offer you special trainings. The special training provides the understanding to meet your specific requirements continuously in practice. We offer trainings for auditors, inspection preparation, IT, technical staff, trainers and much more.

Webinar Qualified trainers train your staff through an online webinar. Employees from different locations and departments can take part in the online training.

Inform yourself online:

We create an individual training concept for you and your employees.
